

Features

A Line Above is transcription at its best! Our goal is to exceed your facilities' expectations by streamlining your transcription process while providing quality service you can depend on. Using leading-edge technology combined with our state-of-the-art application service provider, we offer you an easy to use, web-based, HIPAA-compliant system for complete medical records management. Our system is user friendly with minimal to no change from current dictation practices. Physicians and administrators have access to their medical records anytime/anywhere, 24 hours a day, when it is convenient to them.

Transcriptions are guaranteed timely turnaround, including STAT priority, without delay in quality. Your facility receives transcriptions as soon as they are completed through real-time uploads. There are no lost dictations. Quickly search medical record database by date of service, medical record number, author, patient name, or any other customizable data point to better manage your facilities medical records. Whether your preference is patient charts or an electronic medical records system, A Line Above will simplify your process allowing you to focus on what matters most, the patient.

Quality is key at A Line Above. Your completed transcriptions are formatted to the most current industry standards according to the Book of Style for Medical Transcription. Our transcriptionists have successfully graduated from an approved (ACCP) medical transcription education program earning a diploma in medical transcription, following the Association for Healthcare Document Integrity (AHDI) practices. Many are certified or registered medical transcriptionists (CMT/RMT). Patient safety is at the forefront of A Line Above. Full quality assurance review process ensures accurate transcripts you can depend on. We not only transcribe the medical record, we understand it.

The web based facility viewer enables medical records administrator to track the record from author dictation to transcript completion. Reports may be edited for content, as needed, saving time on turnaround and enabling facility control of their medical records. Optional additional features include electronic signature and electronic letterhead templates. Autofax, autoprnt, and secure file transfer options are also available. A Line Above will listen to your clinic's needs and facilitate your experience based on your workflow.

Detailed records management is more than just medical records. It is also about your bottom line. With incredible service and improved efficiencies, A Line Above is the right investment for your practice. Contact us today to experience transcription at its best and see what we can do for you!
